(1)The unaudited pro forma net loss per share and pro forma weighted-average number of shares used in computing pro forma net loss per share give effect to (i) the Preferred Stock Conversion, as if such conversion had occurred on January 1, 2025, (ii) the Convertible Notes Conversion, as if such conversion had occurred on January 1, 2025, (iii) the elimination of the change in fair value recognized on convertible promissory notes that converted into shares of our redeemable convertible preferred stock during the periods presented and that convert in the Convertible Notes Conversion, in each case as if such notes had converted on January 1, 2025, (iv) stock-based compensation expense related to RSUs for which the service-based vesting condition was satisfied or partially satisfied, and as if the performance-based condition had been satisfied on January 1, 2025, of $ and $ for the year ended December 31, 2025 and the nine months ended September 30, 2026, respectively, (v) the net issuance of and shares of our Class A common stock upon the vesting and settlement of RSUs, for which the service-based vesting condition was satisfied, and as if the performance-based condition had been satisfied on January 1, 2025, for the year ended December 31, 2025 and the nine months ended September 30, 2026, respectively, and (vi) the filing and effectiveness of our amended and restated certificate of incorporation in Delaware that will become effective immediately prior to the completion of this offering. The pro forma weighted-average number of shares does not give effect to the Initial Public Benefit Issuance, as shares of our Class N common stock held by our wholly owned subsidiary are not considered outstanding for accounting purposes.

(2)As of September 30, 2026, unrecognized stock-based compensation expense not reflected in pro forma net loss per share was $24.1 billion related to RSUs for which the service-based vesting condition was not satisfied, and which is expected to be recognized over a weighted-average period of approximately 2.0 years, and $2.1 billion related to our other outstanding equity awards, which is expected to be recognized over a weighted-average period of approximately 1.4 years.

The following table summarizes the notes outstanding under our NPAs as of September 30, 2026, which consist

(in millions)

Item	Agreement	Principal Amount Outstanding (in millions)	Conversion Price Per Share(1)	Class N Shares Issuable on Conversion(2)
Amazon	Amazon 2023 NPA(3)	$2,186	$2.0928	1,044,716,970

Total	**[BLANK]**	$6,203	**[BLANK]**	1,840,444,962

(1)In connection with this offering, the notes will convert, subject to Amazons ownership cap, which may be waived at Amazons election, into shares of Class N common stock at the lower of the fixed conversion price per share reflected in the table and the initial price per share of Class A common stock set forth on the cover of this prospectus (IPO Price). Following this offering, any notes that could not convert in connection with this offering due to the holders ownership cap will convert at the end of each fiscal quarter at the lowest of such fixed price, the IPO Price, and the 10-day trailing volume-weighted average price of our Class A common stock, subject to such continued ownership cap.

(2)Assumes conversion at the applicable price in the column titled Conversion Price Per Share and represents the aggregate number of shares of Class N common stock issuable upon conversion of the notes, without giving effect to the holders ownership cap. The principal amount of any notes that cannot convert without exceeding the applicable ownership cap will be re-issued as a non-interest-bearing rollover note with substantially identical terms (other than any reduction in principal as a result of any partial conversion up to Amazons ownership cap). The remaining rollover notes would remain outstanding following this offering and would automatically convert at the end of each subsequent fiscal quarter as described above, to the extent such conversion would not exceed Amazons ownership cap, which may be waived at Amazons election. The number of shares of Class N common stock issued upon conversion at the completion of this offering, and the aggregate principal amount of notes remaining outstanding as rollover notes following this offering, will be determined based on the final offering size and Amazons election with respect to the ownership cap.

(3)Matures March 2034, subject to earlier repayment or conversion.

(4)Reflects the aggregate principal amount of notes outstanding under the Amazon 2024 NPA, which were issued across three tranches and will mature in January 2035, May 2035, and November 2035, as applicable, in each case subject to earlier repayment or conversion.

(1)Consists of operating leases for corporate offices and compute and infrastructure with a weighted-average remaining lease term of 10.3 years as of September30, 2026. See Note 7 to our consolidated financial statements included elsewhere in this prospectus for more information.

(2)Consists of finance leases for compute and infrastructure with a weighted-average remaining lease term of 4.8 years as of September30, 2026. See Note 7 to our consolidated financial statements included elsewhere in this prospectus for more information.

(3)Primarily consists of future minimum payments under CSP hosting and other third-party infrastructure service agreements. The table reflects future minimum payments under our non-cancelable purchase commitments with a remaining term in excess of one year. See Note 13 to our consolidated financial statements included elsewhere in this prospectus for more information.

(4)Excludes $6.2 billion aggregate principal amount outstanding under the Amazon Notes as of September30, 2026, which are expected to be settled in shares rather than cash. We may issue up to an additional $77.0 billion of convertible promissory notes, subject to applicable conditions. See the section titled Convertible Notes for more information.

(5)Excludes certain other compute and infrastructure arrangements that do not specify a fixed dollar commitment which are not included in the aggregate above. Payments under these arrangements will depend on the capacity made available and deployed, delivery timing, pricing mechanics, and the satisfaction, or our waiver, of certain other deployment conditions. Because these factors are not yet determinable, the total amount of payments under these arrangements is uncertain, but we currently estimate such payments to be approximately $150 billion to $175 billion. We expect these amounts to be payable over time after the capacity is delivered. See the section titled Infrastructure Service Arrangements below for more information, including a description of the conditions referred to above.

Sunset Provisions

Item	Class T Sunset Time	Class F Sunset Time

Trigger	The Class T Sunset Time occurs when no Class T common stock remains outstanding, including due to the redemption of our Class T common stock or an amendment to the rights of our Class T common stock that eliminates our Class T common stock, which in each case requires the approval of persons comprising the Trust Amendment Threshold. The Trust Amendment Threshold may be satisfied as follows if the Trustees are voting in favor of the action, upon approval of 80% of the authorized members of our board of directors and 80% of the Trustees then in office (in each case, rounded up or down to the nearest whole number (any exact 0.5 rounding up)) if our Class F common stock remains outstanding and the Trustees are not voting in favor of the action until the third anniversary of the completion of this offering, upon approval by (i) our Class F common stock acting pursuant to the unanimous approval of the Continuing Founders, (ii) a majority of the votes cast by our Class E common stock (subject to a quorum of 40% of our outstanding Class E common stock), and (iii) a majority of the votes cast by outstanding Class A common stock (subject to a quorum of a majority of outstanding Class A common stock) or at any time, upon approval by (i) the Class F common stock acting by decision of 66 23% of the Continuing Founders (rounded up to the nearest whole number), (ii) 75% of the votes cast by our Class E common stock (subject to a quorum of a majority of outstanding Class E common stock), and (iii) a majority of the votes cast by our Class A common stock (subject to a quorum of a majority of outstanding Class A common stock) or if no Class F common stock remains outstanding and the Trustees are not voting in favor of the action, upon approval of 85% of our outstanding Class A common stock. The Class T Sunset Time does not occur automatically upon the lapse of time or the occurrence of specific events. Any action resulting in the occurrence of the Class T Sunset Time requires approval of persons comprising the Trust Amendment Threshold. The Class T Sunset Time, once triggered, is not subject to extension, delay, or waiver.	The Class F Sunset Time occurs on the earlier of (i) the time when no Class F common stock remains outstanding, including due to the redemption of our Class F common stock agreed to by a Supermajority of the Continuing Founders or upon the dissolution of the Founder LLC, and (ii) the completion of the Class F Transition Period. The Class F Transition Period commences when there have been fewer than three Continuing Founders (not including any successor member who is a Non-Qualifying Member as defined in the Founder LLC Agreement) for 90 consecutive calendar days.

Continuation		A Continuing Founder will be removed from the Founder LLC upon the earliest to occur of (i) such Continuing Founders resignation as a member of the Founder LLC (ii) such Continuing Founders death or incapacity (iii) with respect to each of our seven original co-founders, such original co-founders ceasing to hold (together with such original co-founders related holders) on any record date for a vote of our stockholders a number of shares of Class A common stock (including shares subject to options, RSUs, and other convertible securities) equal to at least 2% of the shares of Class A common stock held by such original co-founder and their related holders as of the completion of this offering (iv) such Continuing Founders removal for cause, which includes specified competitive activities described in the Founder LLC Agreement (v) with respect to any successor member admitted to the Founder LLC prior to the commencement of the Class F Transition Period, other than a successor member who is a member during the Class F Transition Period, the tenth anniversary of the completion of this offering or (vi) with respect to each of our seven original co-founders, the commencement of a leave of absence approved by a Supermajority of the other Continuing Founders, which may not be approved during the Class F Transition Period or if the grant of the leave of absence would itself cause the Class F Transition Period to commence. Removals due to resignation, death, or the occurrence of the tenth anniversary of the completion of this offering occur automatically without any determination by any other person. Removals due to incapacity require determination by a qualified physician jointly selected by the affected Continuing Founder and a majority of the other Continuing Founders (in the case of physical or mental impairment) or determination by a Supermajority of the other Continuing Founders (in the case of wrongful imprisonment, unlawful detention, or captivity or restraint), subject to the affected Continuing Founders right to contest such determination. Removals due to cause require an affirmative determination by a Supermajority of the other Continuing Founders, subject to the affected Continuing Founders right to contest such determination or, in the case of specified categories of cause, to cure the basis for such removal. Removals due to incapacity, cause, or the failure to maintain the minimum ownership threshold require prior written notice from the Founder LLC by action of a majority of the other Continuing Founders. If a Continuing Founder is removed due to death or incapacity during the first ten years following the completion of this offering, a successor member may be admitted to the Founder LLC and will count toward the three Continuing Founders required to avoid triggering the Class F Transition Period until the tenth anniversary of the completion of this offering. The Class F Sunset Time, once triggered, is not subject to extension, delay, or waiver.

Changes in Voting Power and Director Election and Removal Rights	Prior to the Class T Sunset Time, the LTBT, as the sole holder of Class T common stock, will generally have the authority to elect and remove the Class T directors, who constitute a majority of the authorized members of our board of directors. The share of our Class T common stock has no voting rights with respect to matters submitted to stockholders generally, except as set forth within our amended and restated certificate of incorporation, including with respect to the election of a majority of our board of directors or as required by law. Following the Class T Sunset Time, if our Class F common stock remains outstanding, our Class A common stock and Class F common stock, voting together as a single class, will elect all of our directors. Because our Class F common stock is entitled to an aggregate number of votes equal to 50.1% of the total voting power of our outstanding shares of capital stock, the Founder LLC would have the ability to determine the outcome of all matters submitted to a vote of stockholders generally, including the election of all directors. If neither our Class T common stock nor Class F common stock remains outstanding, our Class A common stock would have the ability to determine the outcome of all matters submitted to a vote of stockholders generally, including the election of all directors.	Prior to the Class F Sunset Time, our Class F common stock will be entitled to an aggregate number of votes that equals 50.1% of the total voting power of our outstanding shares of capital stock as of the applicable record date and, together with our Class A common stock, voting together as a single class, will elect the directors other than the Class T directors and decide all other matters put to a vote of stockholders generally. Immediately after the Class F Sunset Time, if our Class T common stock remains outstanding, the LTBT would continue to have the authority to elect and remove the Class T directors, who would constitute a majority of the authorized members of our board of directors. However, the LTBT would no longer need to comply with the procedures for nomination, removal, or change in the Class T director designated as the Specified Class T Director. In such a case, our Class A common stock would elect and remove the remaining directors and decide all other matters put to a vote of stockholders generally. If neither our Class T common stock nor Class F common stock remains outstanding, our Class A common stock would have the ability to determine the outcome of all matters submitted to a vote of stockholders generally, including the election of all directors.

Compensation Governance Highlights

—

Item	What We Do Not Do
Maintain a competitive, consistent, and simple compensation philosophy to attract, retain, and motivate top executive talent.	Enter into employment agreements that provide for fixed terms, automatic compensation increases, or guaranteed equity grants.
Focus our executive compensation program on at-risk compensation, which aligns stockholder and executive interests.	Provide single-trigger change of control benefits or excessive cash severance.
Deliver a majority of our NEOs compensation opportunities in the form of long-term equity awards.	Provide our NEOs with golden parachute excise tax reimbursement or gross-ups.
Conduct regular compensation reviews to ensure alignment with competitive market practices.	Provide perquisites as a meaningful component of our executive compensation.
Provide for double-trigger change of control severance provisions for only our Chief Financial Officer, and none of our other NEOs.	Maintain any executive pension plans, or any retirement programs that are not generally available to all employees.
[BLANK]	Award option grants at discounted stock prices.

The key elements of our 2025 executive compensation program are summarized in the table below.

—

Item	Form of Compensation	Guaranteed vs. At-Risk	Philosophy

Base Salary	Cash	Guaranteed	Provide market-competitive fixed compensation to attract and retain key executives.
Long-Term Equity Incentive Program	Service-Based Options RSUs with Service-Based and Performance-Based Vesting Conditions	At-Risk	The value of option and RSU awards is correlated to our stock price, promoting sustainable long-term value creation. Multi-year service vesting schedule promotes retention, long-term ownership, and continuity of leadership.
Other Benefits	Other	NA	Aligned with market practices and serve to attract, motivate, and retain key talent. Intended to ensure the safety of our NEOs, enhance productivity, and minimize distractions.

(1)All awards were granted pursuant to our 2021 Plan, the terms of which are described below under the section titled Equity PlansAmended Restated 2021 Stock Plan.

(2)Amounts reported represent the fair market value of our Class A common stock of $17.66 per share as of December 31, 2025.

(3)112th of the total shares subject to the option vested on the one-month anniversary of the vesting commencement date (January 1, 2025), and 112th of the total shares vested in equal monthly installments thereafter, subject to the NEOs continued service with the company through each applicable vest date.

(4)14th of the total shares subject to the option vested on the first anniversary of the vesting commencement date (April 18, 2024), and 148th of the total shares will vest in equal monthly installments thereafter, subject to the NEOs continued service with the company through each applicable vest date.

(5)The RSUs vest on the first date upon which both aservice-basedcondition and a performance-based condition are satisfied. The service-based condition is satisfied as to 112th of the RSUs on the 15-month anniversary of the vesting commencement date (November 20, 2024) and on each three-month anniversary thereafter, subject to the NEOs continued service with the company through each applicable service-based vest date. The performance-based condition will be satisfied upon the effectiveness of the registration statement of which this prospectus forms a part.

(1)Good reason, cause, and disability are defined in the Rao Offer Letter.

(2)This amount is equal to six months of Mr. Raos annual base salary, to be paid in a lump sum.

(3)This amount represents the value of acceleration of 18th of the total number of shares subject to the Rao Options (1,750,000 shares). This amount is based on the fair market value of our Class A common stock of $17.66 per share as of December 31, 2025, minus the option exercise price of $1.30 per share, multiplied by the number of shares subject to acceleration.

(4)Amount is based on a payment equal to the premium cost of continued health coverage under COBRA for a period of six months.

*Represents beneficial ownership of less than 1%.

Represents the percentage of the total votes attributable to all outstanding shares of our Class A common stock and Class F common stock. Does not include (i) our Class T common stock, which is held by the LTBT, and which generally has the authority to elect and remove the Class T directors, who together will constitute a majority of the authorized members of our board of directors, and is generally not entitled to vote with respect to matters submitted to a vote of stockholders, (ii) our Class N common stock, which is not entitled to vote on any matter that is submitted to a vote of stockholders, except as otherwise required by law, or (iii) our Class E common stock, which is not entitled to vote for the election of directors.

Holders of our Class A common stock are entitled to one vote per share on all matters submitted to stockholders generally. Our Class F common stock is entitled to a fixed 50.1% of the voting power of our outstanding capital stock as of the applicable record date on matters submitted to stockholders generally. As a result, the voting power of the holders of Class A common stock is limited to an aggregate of

49.9% of the total outstanding voting power as of the applicable record date. Accordingly, the voting power of each holder of Class A common stock has been reduced to 49.9% of the percentage shown before the offering (taking into account the reduction of voting power due to shares sold in the offering).

We expect that our seven co-founders, including Dr. Amodei and Ms. Amodei, will enter into the Founder LLC Agreement shortly before the effectiveness of the registration statement of which this prospectus forms a part. The Founder LLC Agreement will provide that the share of Class F common stock will be voted, consented, or not consented, in the manner determined by a vote of the Continuing Founders as prescribed by the Founder LLC Agreement, with each Continuing Founder entitled to one vote. With respect to each of our co-founders, the voting power percentage provided does not include the voting power of our Class F common stock held by the Founder LLC. The Founder LLC Agreement will not govern the voting of any shares of our Class A common stock held by the co-founders or their related holders. Each co-founder (or their related holders) will be able to vote shares of our Class A common stock held by them in their discretion, regardless of the manner in which the Founder LLC will vote our Class F common stock. For more information, please see the sections titled Our Governance Structure and Its GoalsFounder Voting Structure, Our Co-Founders, and Description of Capital StockCommon StockVoting Rights.

Sunset Provisions

Two content columns (Class T Sunset Time, Class F Sunset Time) with row labels in an unlabeled first column; header repeats after each printed page break (lines 30806-30808, 30916-30918) and those repetitions are skipped.

Item	Class T Sunset Time	Class F Sunset Time
Trigger	The Class T Sunset Time occurs when no Class T common stock remains outstanding, including due to the redemption of our Class T common stock or an amendment to the rights of our Class T common stock that eliminates our Class T common stock, which in each case requires the approval of persons comprising the Trust Amendment Threshold. The Trust Amendment Threshold may be satisfied as follows if the Trustees are voting in favor of the action, upon approval of 80% of the authorized members of our board of directors and 80% of the Trustees then in office (in each case, rounded up or down to the nearest whole number (any exact 0.5 rounding up)) if our Class F common stock remains outstanding and the Trustees are not voting in favor of the action until the third anniversary of the completion of this offering, upon approval by (i) our Class F common stock acting pursuant to the unanimous approval of the Continuing Founders, (ii) a majority of the votes cast by our Class E common stock (subject to a quorum of 40% of our outstanding Class E common stock), and (iii) a majority of the votes cast by outstanding Class A common stock (subject to a quorum of a majority of outstanding Class A common stock) or at any time, upon approval by (i) our Class F common stock acting by decision of 66 23% of the Continuing Founders (rounded up to the nearest whole number), (ii) 75% of the votes cast by our Class E common stock (subject to a quorum of a majority of outstanding Class E common stock), and (iii) a majority of the votes cast by our Class A common stock (subject to a quorum of a majority of outstanding Class A common stock) or if no Class F common stock remains outstanding and the Trustees are not voting in favor of the action, upon approval of 85% of our outstanding Class A common stock. The Class T Sunset Time does not occur automatically upon the lapse of time or the occurrence of specific events. Any action resulting in the occurrence of the Class T Sunset Time requires approval of persons comprising the Trust Amendment Threshold. The Class T Sunset Time, once triggered, is not subject to extension, delay, or waiver.	The Class F Sunset Time occurs on the earlier of (i) the time when no Class F common stock remains outstanding, including due to the redemption of our Class F common stock agreed to by a Supermajority of the Continuing Founders or upon the dissolution of the Founder LLC, and (ii) the completion of the Class F Transition Period. The Class F Transition Period commences when there have been fewer than three Continuing Founders (not including any successor member who is a Non-Qualifying Member as defined in the Founder LLC Agreement) for 90 consecutive calendar days.

Continuation		A Continuing Founder will be removed from the Founder LLC upon the earliest to occur of (i) such Continuing Founders resignation as a member of the Founder LLC (ii) such Continuing Founders death or incapacity (iii) with respect to each of our seven original co-founders, such original co-founders ceasing to hold (together with such original co-founders related holders) on any record date for a vote of our stockholders a number of shares of Class A common stock (including shares subject to options, RSUs, and other convertible securities) equal to at least 2% of the shares of Class A common stock held by such original co-founder and their related holders as of the completion of this offering (iv) such Continuing Founders removal for cause, which includes specified competitive activities described in the Founder LLC Agreement (v) with respect to any successor member admitted to the Founder LLC prior to the commencement of the Class F Transition Period, other than a successor member who is a member during the Class F Transition Period, the tenth anniversary of the completion of this offering or (vi) with respect to each of our seven original co-founders, the commencement of a leave of absence approved by a Supermajority of the other Continuing Founders, which may not be approved during the Class F Transition Period or if the grant of the leave of absence would itself cause the Class F Transition Period to commence. Removals due to resignation, death, or the occurrence of the tenth anniversary of the completion of this offering occur automatically without any determination by any other person. Removals due to incapacity require determination by a qualified physician jointly selected by the affected Continuing Founder and a majority of the other Continuing Founders (in the case of physical or mental impairment) or determination by a Supermajority of the other Continuing Founders (in the case of wrongful imprisonment, unlawful detention, or captivity or restraint), subject to the affected Continuing Founders right to contest such determination. Removals due to cause require an affirmative determination by a Supermajority of the other Continuing Founders, subject to the affected Continuing Founders right to contest such determination or, in the case of specified categories of cause, to cure the basis for such removal. Removals due to incapacity, cause, or the failure to maintain the minimum ownership threshold require prior written notice from the Founder LLC by action of a majority of the other Continuing Founders. If a Continuing Founder is removed due to death or incapacity during the first ten years following the completion of this offering, a successor member may be admitted to the Founder LLC and will count toward the three Continuing Founders required to avoid triggering the Class F Transition Period until the tenth anniversary of the completion of this offering. The Class F Sunset Time, once triggered, is not subject to extension, delay, or waiver.

Changes in Voting Power and Director Election and Removal Rights	Prior to the Class T Sunset Time, the LTBT, as the sole holder of Class T common stock, will generally have the authority to elect and remove the Class T directors, who constitute a majority of the authorized members of our board of directors. The share of our Class T common stock has no voting rights with respect to matters submitted to stockholders generally, except as set forth within our amended and restated certificate of incorporation, including with respect to the election of a majority of our board of directors or as required by law. Following the Class T Sunset Time, if our Class F common stock remains outstanding, our Class A common stock and Class F common stock, voting together as a single class, will elect all of our directors. Because our Class F common stock is entitled to an aggregate number of votes equal to 50.1% of the total voting power of our outstanding shares of capital stock, the Founder LLC would have the ability to determine the outcome of all matters submitted to a vote of stockholders generally, including the election of all directors. If neither our Class T common stock nor Class F common stock remains outstanding, our Class A common stock would have the ability to determine the outcome of all matters submitted to a vote of stockholders generally, including the election of all directors.	Prior to the Class F Sunset Time, our Class F common stock will be entitled to an aggregate number of votes that equals 50.1% of the total voting power of our outstanding shares of capital stock as of the applicable record date and, together with our Class A common stock, voting together as a single class, will elect the directors other than the Class T directors and decide all other matters put to a vote of stockholders generally. Immediately after the Class F Sunset Time, if our Class T common stock remains outstanding, the LTBT would continue to have the authority to elect and remove the Class T directors, who would constitute a majority of the authorized members of our board of directors. However, the LTBT would no longer need to comply with the procedures for nomination, removal, or change in the Class T director designated as the Specified Class T Director. In such a case, our Class A common stock would elect and remove the remaining directors and decide all other matters put to a vote of stockholders generally. If neither our Class T common stock nor Class F common stock remains outstanding, our Class A common stock would have the ability to determine the outcome of all matters submitted to a vote of stockholders generally, including the election of all directors.

Class F Common Stock Voting Mechanics

—

Item	Threshold(1)	If threshold is met	Otherwise
General stockholder matters	Majority(2)	Class F common stock is voted accordingly.	Class F common stock is voted proportionately with the votes of Class A common stock cast (subject to a quorum of a majority of outstanding Class A common stock).
Amendments to Class F rights	Supermajority(3)(4)	Class F common stock is voted for the proposal.	Class F common stock is voted against (or withhold as to) the proposal.
Amendments to LTBT Class T rights	Trust Amendment Supermajority(4)(5)	Class F common stock is voted for the proposal.	Class F common stock is voted against (or withhold as to) the proposal.
Written consent	The applicable majority, Supermajority(3), or Trust Amendment Supermajority(5) if action were taken at a meeting.	Consent is delivered with respect to our Class F common stock.	No consent is delivered with respect to our Class F common stock.

(1)Each Continuing Founder will be entitled to one vote when determining how our Class F common stock will be voted.

(2)If a majority of the Continuing Founders deliver the same instruction as to how the votes corresponding to our Class F common stock shall be cast, including for, against, or withhold, but excluding an instruction to abstain, our Class F common stock will be voted accordingly. If a majority of the Continuing Founders deliver instructions to abstain or do not deliver the same or any instructions, our Class F common stock will be voted proportionately with the votes of Class A common stock cast (subject to a quorum of a majority of outstanding Class A common stock).

(3)Supermajority means the total number of Continuing Founders entitled to vote, minus one, delivers instructions to vote for the proposal. If there are fewer than three Continuing Founders, a Supermajority requires unanimity of Continuing Founders.

(4)If a proposal requires both a Supermajority and a Trust Amendment Supermajority, both thresholds must be satisfied.

(5)A Trust Amendment Supermajority will be satisfied if (i) 66 23% of the Continuing Founders, rounded up to the nearest whole number, deliver instructions to vote for the proposal, and approval by 75% of the votes cast by our Class E common stock (subject to a quorum of a majority of outstanding Class E common stock) and a majority of the votes cast by our Class A common stock (subject to a quorum of a majority of the outstanding shares of Class A common stock) is also obtained or (ii) until the third anniversary of the completion of this offering, the Continuing

Founders unanimously deliver instructions to vote for the proposal, and approval by a majority of the votes cast by our Class E common stock (subject to a quorum of 40% of our outstanding Class E common stock) and a majority of the votes cast by our outstanding Class A common stock (subject to a quorum of a majority of outstanding shares of Class A common stock) is also obtained. Pursuant to the Stockholders Agreement, the Founder LLC will also vote or consent the share of Class F common stock in favor of amendments that are approved by 80% of the authorized members of our board of directors and 80% of the Trustees then in office (in each case, rounded up or down to the nearest whole number (any exact 0.5 rounding up)).

Pipeline: section-aligned chunking → parallel GLM extraction (z-ai/glm-5.3-flash via OpenRouter, temperature 0) → quote re-anchoring by grep → deterministic cross-foot checks. Raw extractions, per-chunk digests, and check results: `scratchpad/anthropic_ipo/numbers_digest/`. Analyst commentary is confined to RECONCILIATION.md and never appears in this document.
